

# "Day 5 - Testing and Backend Refinement – Food Tuck"

## Performance of UI

- **Issues:**
  - UI is getting slower and slower.
  - Some components that were working previously are no longer functioning.
- **Component Behavior:**
  - Components functioning correctly on /ShoppingCart:
    1. Star
    2. Amount setter
  - Components failing on /Shop/[id]/page.tsx.
- **Rendering Issues:**
  - The /Shop route, where the food list is displayed:
    - Appears correctly on localhost:3000.
    - Does not display the list of items on the Vercel deployment or network address as expected.
- **Build Warning:**
  - Cause: Using an experimental API version, which:
    0. May change without warning.
    1. May contain serious bugs.
  - This warning appears at the end of the build process during `npm run build`.
  -
- **Routing Performance:**
  - Routes are working slower.
  - No explicit errors are detected.

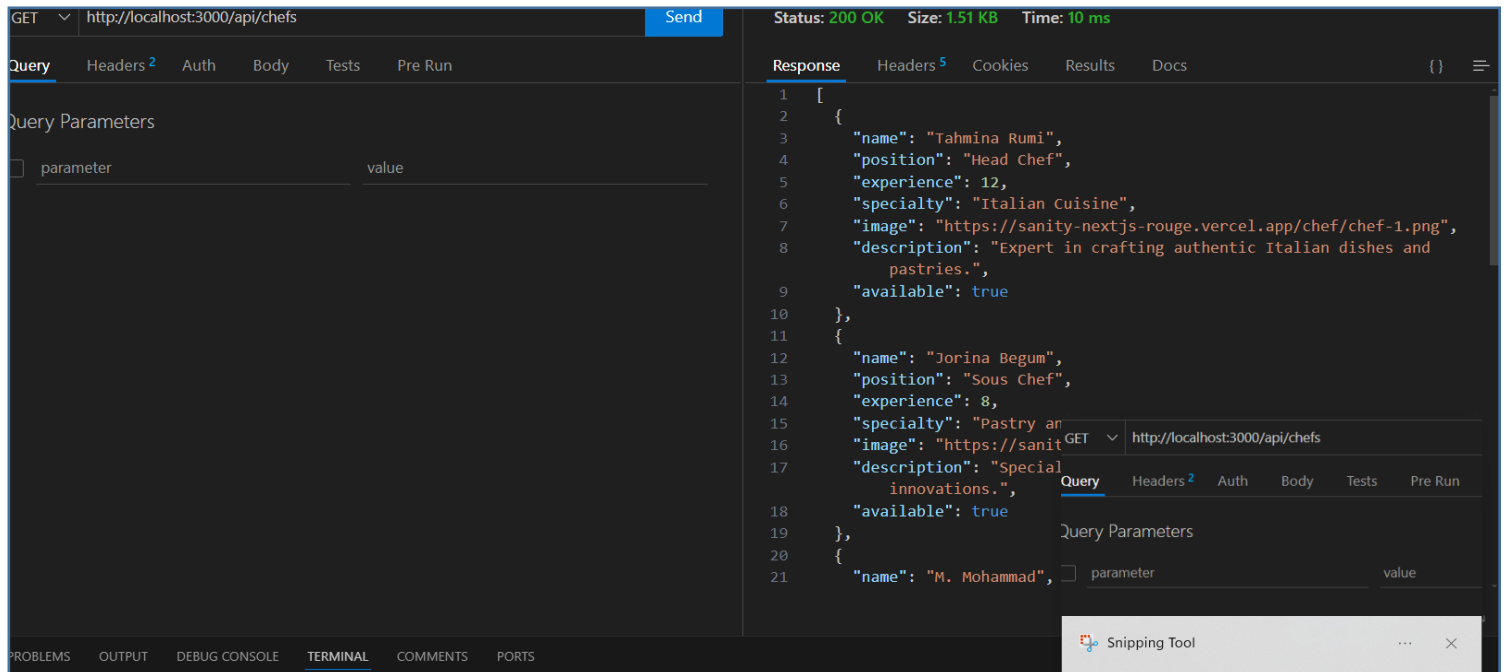

## Performance of API

- **API Status:**
  - APIs tested successfully using Thunder Client:
    - /foods: 200 success.
    - /chefs: 200 success.

The screenshot shows the Thunder Client interface. The top bar displays the method 'GET', the URL 'http://localhost:3000/api/foods/', and a 'Send' button. Below this, the 'Query' tab is active, showing a table for query parameters with columns 'parameter' and 'value'. The 'Response' tab is also visible, showing the status '200 OK', size '1.5 KB', and time '38 ms'. The response body is a JSON array of food items:

```
1 [
2   {
3     "name": "Fresh Lime",
4     "category": "Drink",
5     "price": 38,
6     "originalPrice": 45,
7     "tags": [
8       "Healthy",
9       "Popular"
10    ],
11    "image": "https://sanity-nextjs-rouge.vercel.app/food/food-1.png",
12    "description": "Refreshing fresh lime drink made with natural ingredients.",
13    "available": true
14  },
15  {
16    "name": "Chocolate Muffin",
17    "category": "Dessert",
```

# "Day 5 - Testing and Backend Refinement – Food Tuck"

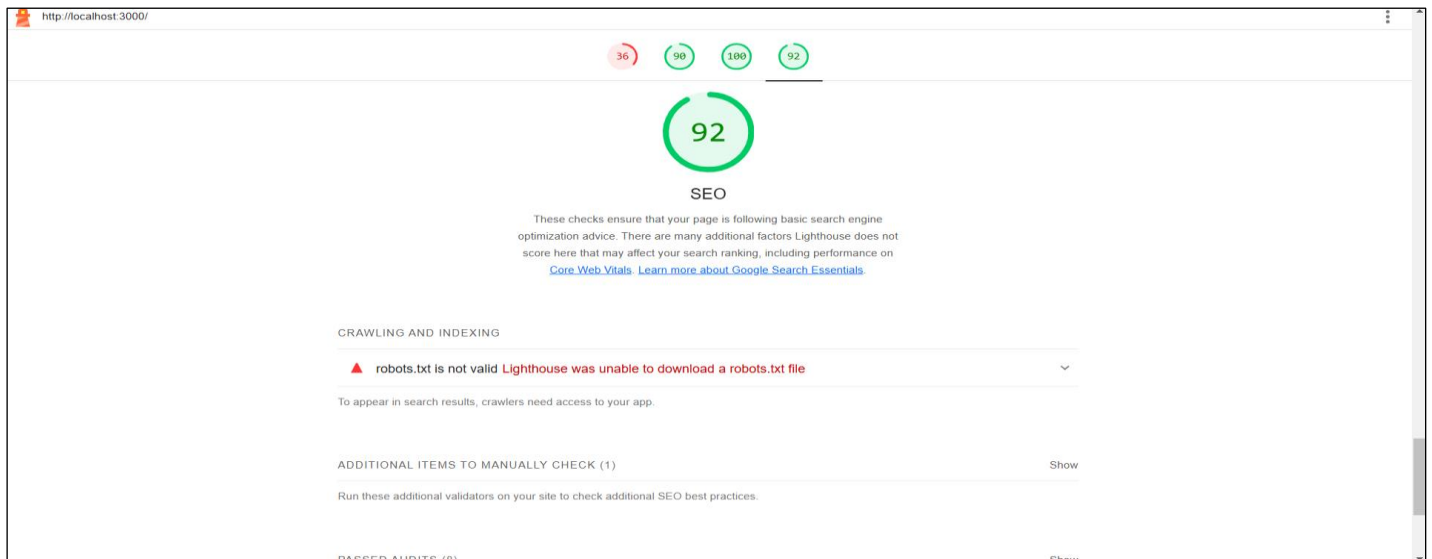

## Challenges:

- Most of the functionality is not working like they were doing before
- Search / wishlist are fail to be create
- Route are working slower
- API get disappear in /Shop at Vercel app
- Only things I successfully completed are
  1. Check box
  2. Related items
  3. Dynamic route
  4. responsive UI
